Smile Dental Clinic

Patient Handbook - Edition 2026

1. About Us

Smile Dental Clinic was founded in 2012 by Dr. Ahmed Samir with a simple goal: to make dental care comfortable, honest and affordable for every family in Giza. Over the years we have grown from a single room with one chair into a modern clinic with five treatment rooms, a digital X-ray unit and a dedicated children's area.

We treat more than 4,000 patients every year. Our philosophy is prevention first: we would rather spend ten minutes teaching you how to brush correctly than spend an hour fixing a cavity later. Every treatment plan is explained to the patient before we start, including the cost, the number of sessions and any possible risks.

The clinic is accredited by the Egyptian Dental Syndicate and follows international infection-control standards. All instruments are sterilized in an autoclave after every use, and single-use items such as needles, gloves and suction tips are never reused.

2. Working Hours

The clinic is open Sunday to Thursday from 9:00 AM to 9:00 PM. On Saturday we work shorter hours, from 10:00 AM to 4:00 PM. We are closed on Fridays and on official public holidays.

During the holy month of Ramadan, working hours change to 11:00 AM - 3:00 PM and 8:00 PM - 12:00 AM. The exact Ramadan schedule is announced on our Facebook page two weeks before the month starts.

Emergency Service

Dental emergencies do not wait for working hours. If you have severe pain, swelling in the face, a knocked-out tooth or bleeding that does not stop after 20 minutes, call our emergency hotline at 0100-123-4567. The hotline works 24 hours a day, 7 days a week, and the on-call dentist will either give you instructions by phone or meet you at the clinic.

Emergency visits outside working hours have an extra fee of 400 EGP on top of the normal treatment price. Emergency visits during working hours have no extra fee, but you may need to wait a short time if the dentists are with other patients.

If a permanent tooth is knocked out, pick it up by the crown (the white part), not the root. Rinse it gently with milk or clean water, do not scrub it, and try to put it back in its socket. If you cannot, keep it in a cup of milk and come to the clinic within one hour. The faster you arrive, the higher the chance of saving the tooth.

3. Our Dentists

Dr. Ahmed Samir - Founder and Head of the clinic. Specialist in dental implants and oral surgery, with more than 18 years of experience. Available Sunday, Tuesday and Thursday.

Dr. Mona Khaled - Orthodontist (braces and aligners). Master's degree from Cairo University. Available Monday and Wednesday, and Saturday mornings.

Dr. Youssef Adel - Endodontist, specialized in root canal treatment, including difficult and repeated cases. Available Sunday to Wednesday.

Dr. Salma Fathy - Pediatric dentist who treats children from age 3 to 14. She uses a gentle, step-by-step approach and a reward system to help anxious kids feel safe. Available every working day from 2:00 PM.

4. Services

General and Preventive Care

Our general services include full checkups, digital X-rays, professional teeth cleaning (scaling and polishing), fluoride treatment and fissure sealants. We recommend a checkup and cleaning every six months for adults and every four months for smokers and patients with gum disease.

Restorative Treatment

We repair damaged teeth with tooth-colored composite fillings, root canal treatment, crowns and bridges. We no longer use silver (amalgam) fillings. Crowns are available in two types: porcelain fused to metal, and full zirconia, which looks more natural and is recommended for front teeth.

Cosmetic Dentistry

Cosmetic services include in-clinic teeth whitening, take-home whitening kits, veneers and smile design. Whitening is not suitable for pregnant women or for patients under 16 years old. The results of whitening usually last between one and two years, depending on how much coffee, tea and smoking the patient has.

Orthodontics

We offer traditional metal braces, clear ceramic braces and clear aligners. The average treatment time is 18 to 24 months. Adults can get braces at any age as long as their gums are healthy.

Implants and Surgery

Dental implants replace missing teeth with a titanium screw and a crown. The full process usually takes 3 to 6 months because the bone needs time to heal around the implant. We also perform wisdom tooth extraction and minor gum surgery.

5. Price List

All prices are in Egyptian Pounds (EGP) and were updated in January 2026. The final price may change after the examination depending on the case.

Service	Price (EGP)	Sessions
Checkup and consultation	300	1
Digital X-ray (single tooth)	150	1
Panoramic X-ray	450	1
Scaling and polishing	500	1
Composite filling	600 - 900	1
Root canal - front tooth	1,500	1 - 2
Root canal - molar	2,500	2 - 3
Simple extraction	400	1
Wisdom tooth surgical extraction	1,800	1
Zirconia crown	4,500	2
In-clinic whitening	2,500	1
Metal braces (full treatment)	18,000	18 - 24 months
Clear aligners (full treatment)	45,000	12 - 18 months
Dental implant with crown	22,000	3 - 6 months

Children under 14 get a 20% discount on all treatments with Dr. Salma Fathy. Students with a valid university ID get a 10% discount on checkups, cleaning and fillings. Discounts cannot be combined.

6. Payment and Insurance

We accept cash, Visa and Mastercard credit and debit cards, Meeza cards, and mobile wallets such as Vodafone Cash and InstaPay. We do not accept personal cheques.

For treatments that cost more than 10,000 EGP, such as braces, aligners and implants, we offer installment plans over 6 or 12 months with no interest. A down payment of 25% is required at the start of treatment, and the remaining amount is divided into equal monthly payments.

We work with the following insurance companies: AXA, Allianz, MetLife and GlobeMed. Please bring your insurance card and national ID to every visit. Insurance usually covers checkups, X-rays, fillings and extractions, but most policies do not cover cosmetic treatments such as whitening and veneers. Please check your policy before your visit.

7. Booking, Cancellation and Late Arrival

You can book an appointment in three ways: by calling 0100-123-4567, by sending a WhatsApp message to the same number, or through the booking form on our website. New patients are asked to arrive 15 minutes early to fill in their medical history form.

If you need to cancel or change your appointment, please tell us at least 24 hours before. Cancellations with less than 24 hours notice, or not showing up at all, will be charged a fee of 100 EGP, which is added to your next visit. After three missed appointments, we may ask for a deposit before booking again.

If you arrive more than 15 minutes late, we may not be able to see you, and your appointment may be moved to the next available time.

8. Before and After Your Treatment

Before your visit

Tell the dentist about any medical conditions such as diabetes, heart disease or high blood pressure, and about any medicines you take, especially blood thinners like aspirin or warfarin. If you are pregnant or think you might be, tell us before any X-ray.

After a tooth extraction

Bite on the gauze for 30 minutes. Do not rinse your mouth, spit, smoke or drink through a straw for 24 hours, because this can remove the blood clot and cause a painful condition called dry socket. Eat soft, cold food on the first day and avoid hot drinks.

After a filling or root canal

Wait until the numbness goes away before eating, usually 2 to 3 hours, so you do not bite your cheek or tongue. Mild sensitivity for a few days is normal. If the pain becomes severe or lasts more than a week, contact the clinic.

After whitening

For 48 hours after whitening, avoid coffee, tea, cola, red sauces and smoking, because the teeth absorb colors easily during this time.

9. Frequently Asked Questions

Is parking available? Yes, free parking is available behind the building.

Can I bring my child to my own appointment? Yes, but children must stay with an adult in the waiting area. We cannot watch children during your treatment.

Do you treat patients with special needs? Yes. The clinic is on the second floor and the building has an elevator. Please tell us when booking so we can give you a longer appointment.

Is the treatment painful? We use local anesthesia for all treatments that may cause pain. For very anxious patients, we offer sedation with nitrous oxide (laughing gas) for an extra 600 EGP.

Do you speak English? Yes, all our dentists and the reception team speak English.

10. Location and Contact

Smile Dental Clinic, 15 El Tahrir Street, Dokki, Giza. Second floor, above Misr Pharmacy. The nearest metro station is Dokki station, about a 7-minute walk.

Phone and WhatsApp: 0100-123-4567. Email: info@smiledental-example.com. Facebook and Instagram: @SmileDentalGiza.
